

Short-term Care Insurance:¹ The Wellabe Difference

When one health care situation leads to in-home or nursing facility assistance, it can quickly deplete savings. Short-term Care insurance not only helps your clients maintain an active lifestyle and stay in their home, but it also makes sure their retirement is well protected. Our Short-term Care insurance is:

AFFORDABLE

Short-term Care insurance is commonly less expensive than Long-term Care insurance. And Wellabe has a plan for every budget, with competitive premiums and discounts if a household buys more than one product.

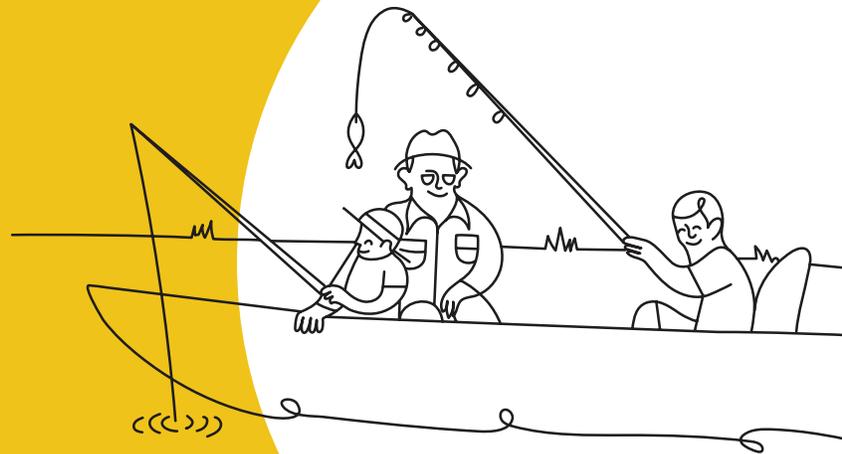

STRAIGHTFORWARD

Short-term Care insurance offers coverage for extended care in the home. It covers both medical and non-medical help, and there's no minimum number of days or stays to be eligible for claim payments. The plan pays a full cash benefit for each day your client receives care.

The name Wellabe comes from the phrase, "We'll always be." It's part of our promise to always be here, making every day better, like we have been since 1929.

FLEXIBLE

Clients create a plan that works for them. Short-term Care insurance comes with base benefits, including a daily benefit of up to \$300. Clients can also choose up to four optional benefits, including facility care, return of premium, adult day care, and inflation protection riders.
